Data Collection and Preprocessing Phase

Date	10-july-2024
Team ID	739925
Project Title	Walmart Sales Analysis For Retail Industry
Maximum Marks	6 Marks

Data Exploration and Preprocessing Report

Dataset variables will be statistically analyzed to identify patterns and outliers, with Python employed for preprocessing tasks like normalization and feature engineering. Data cleaning will address missing values and outliers, ensuring quality for subsequent analysis and modeling, and forming a strong foundation for insights and predictions.
